

CASE STUDY A164: WORM AND WIM - LINE 139

Customer	Infrabel
Location	Heverlee, Belgium - Line 139
Duration	2011-...
Application domain	Conventional and freight trains

On line 139 between Leuven and Ottignies (Belgium), both freight trains and conventional trains pass in the near vicinity of residential areas. Infrabel installed a WORM and WIM system for vehicle wheel flat and out of roundness detection combined with a WIM system for vehicle weighing.
